

1992-98 Raytheon Engineers & Constructors, Marketing Services Department, Birmingham, AL

Desktop Publishing Specialist / Photographer

Generated sales proposals in QuarkXPress that incorporated color graphics and photographs. The charts, graphs, artwork, and covers were done in Adobe Illustrator or DeltaGraph Professional. An Agfa flatbed scanner was used for scanning photographs, transparencies or line art. Once scanned the image could be manipulated for a specific use in Adobe Photoshop.

- Designed a commercial website (www.amerikanpie.com) to market my photographs and freelance services in Adobe Pagemill. Experienced in the world wide web, web creation, and HTML.
- Created and implemented a cross indexed Raytheon photo database in Aldus Fetch.

Produced industrial and corporate photography for in-house use.

- Industrial job site photographs of people at work, construction, maintenance, and project completion.
- Corporate photography includes photographs for in-house publications, sales proposals, public relations, advertising, award banquets and dinners, social functions, charitable causes, and community involvement.
- Photolab skills encompass processing color film (C-41, E-6), slide duplication, copy work, color printing, processing and printing b/w film.

1991-92 Baptist Medical Centers, Creative Services Department, Birmingham, AL
